### **Reasons for Allowance**

1. The following is an examiner's statement of reasons for allowance: the prior art does not teach a micro-oscillation element with at least one torsion bar connecting an oscillation section to a main frame for defining an oscillation axis about which the oscillation section pivotally oscillates relative to the main frame, and having a first spring and a second spring that cause the oscillation section to be supported by the frame with the oscillation section located between the first and second springs where each of the first and second springs having a width which is largest at a portion for connection to the frame and progressively decreases toward the oscillation section and where each of the first and the second springs are deformable in response to oscillation of the oscillation section about the oscillation axis; and wherein the torsion bar is connected to a first portion of the oscillation section at which the oscillation axis passes, each of the first and second springs being connected to a second portion of the oscillation section that is located away from the oscillation axis.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

2. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Karl I.E. Tamai whose telephone number is (571) 272 - 2036.

Art Unit: 2834

The examiner can be normally contacted on Monday through Friday from 8:00 am to 4:00 pm. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mr. Darren Schuberg, can be reached at (571) 272 - 2044. The facsimile number for the Group is (571) 273 - 8300.
